Good Afternoon:

In speaking with you on Tuesday, it looks like a public affairs flyers specific to your business would be useful. Can you verify what you would like relayed? Add, revise or subtract. Please let me know.

- The material that is deposited in the parking lot and non-utilized subsurface areas of the building does not come in contact with building supply materials.
- This material is a rocky matrix and does not “turn” objects radioactive.
- The EPA is removing the material from the building and surrounding parking lot systematically while trying to prevent disruptions to both active businesses on the property.
